

EDUCATION

Carleton University Bachelor of Engineering in Electrical Engineering	September 2025 – April 2029 (expected) Ottawa, ON
University of Waterloo Bachelor of Science in Life Physics	April 2023 Waterloo, ON

SKILLS

Design Tools:	KiCad
Languages:	Python, MATLAB, C, C++
Hardware:	Arduino, Raspberry Pi
Lab equipment:	Oscilloscope, function generator, multimeter

EXPERIENCE

Ice Hockey and Skating Instructor Carleton University Department of Recreation and Athletics	January 2026 – Present Ottawa, ON
<ul style="list-style-type: none">Leading structured on-ice sessions for diverse groups, focusing on skill development and participant engagement.Coordinating with staff to manage attendance and refine lesson plans, ensuring a high-quality experience for all participants.	

STEM Data Annotator Cohere	February – October 2025 Remote
<ul style="list-style-type: none">Assessed AI-generated outputs for accuracy and instruction following, including the annotation of multi-modal datasets for model training.Proposed process refinements that improved review efficiency by 30% while maintaining high data quality standards.	

Teaching Assistant Department of Physics and Astronomy, University of Waterloo	September 2023 – December 2024 Waterloo, ON
<ul style="list-style-type: none">Led physics tutorial and laboratory sessions for 500+ undergraduate students, fostering an engaging and supportive learning environment.Graded assignments, quizzes, and exams, ensuring fair and timely feedback.	

PROJECTS

FPV drone Soldering, RF systems	January 2026 – Present
<ul style="list-style-type: none">Assembling and configuring a high-performance FPV drone, including selecting and soldering core components and flashing firmware (Betaflight).	
Ultrasonic radar system Arduino, C++, Python (GitHub)	February 2026
<ul style="list-style-type: none">Engineered a scanning radar system using a servo and ultrasonic sensor, as well as a temperature and humidity sensor to calibrate the speed of sound for increased accuracy.Developed a Python-based GUI to visualize real-time sensor data through a 2D map of the environment.	
Firewood delivery business website HTML, CSS, Python, Flask	February – March 2025
<ul style="list-style-type: none">Built a custom business website from scratch using Flask, HTML, and CSS to display pricing and services.
